I must get asked about once a month – “if I don’t want the IRS to seize my bank account, levy on my property, or garnish my wages, can’t I just put that property in my wife’s/husband’s/brother’s/sister’s/son’s/daughter’s/mother’s/father’s name, set up a trust or Nevada corporation, or get paid under the table?” There’s just no shortage of schemes – simple and complex – by which people try to avoid tax bills!

First and foremost, let me set the record completely straight – putting property in someone else’s name in order to avoid a tax bill is A CRIME! It can land you in prison for YEARS, and ruin your future ability to vote, get certain jobs, and enjoy countless other benefits which are not available to people with criminal records. Perhaps more to the point, though, it DOESN’T WORK. The IRS and state taxing agencies know how to find hidden assets and reclaim them. They do it all the time!

In any event, why avoid tax problems, when they can be SOLVED with skillful representation?! Call me today, at 866-822-1961, and I’ll show you how.
